FEDERAL COMMUNICATIONS COMMISSION  
WASHINGTON, D.C. 20554

THE SECRETARY - ROOM 222

10 MAY 1993

IN REPLY REFER TO:  
7330-7/1700A3

RECEIVED

MAY 13 1993

FEDERAL COMMUNICATIONS COMMISSION  
OFFICE OF THE SECRETARY

Honorable Steve Buyer  
House of Representatives  
1419 Longworth House Office Building  
Washington, D.C. 20515

Dear Congressman Buyer:

This is in reply to your letter of April 27, 1993, in which you inquired on behalf of several of your constituents regarding the Notice of Proposed Rule Making (Notice) in PR Docket No. 92-235, 57 FR 54034 (1992). This Notice proposes comprehensive changes to the Commission's Rules governing the private land mobile radio services operating in the frequency bands below 512 MHz.

Your constituents are specifically concerned about the impact of these changes on radio control (R/C) hobby users. Enclosed is a discussion paper concerning our proposals for the 72-76 MHz band. In short, we expect there would be no adverse impact on R/C operations because of any proposal contained in the Notice.

We are, of course, sensitive to the concerns of both users of private land mobile radio spectrum and R/C hobbyists. We will, therefore, take your constituents' concerns into account when we develop final rules in this proceeding. As indicated in the Notice, we remain convinced that without significant regulatory change in radio operations in the bands below 512 MHz, the quality of communications in the private land mobile radio services will continue to deteriorate to the point of endangering public safety and the national economy.

We want to thank you for your interest in this proceeding. Your constituents' letters will be included in the record of the proceeding. We expect final rules to be issued in 1994.

Ms. Linda Townsend Solheim  
Director, Legislative Affairs  
Federal Communications Commission  
Room 808  
1919 M Street, N.W.  
Washington, D.C. 20554

Dear Ms. Solheim:

Please find attached a listing of my constituents who have expressed concern over the proposed rule currently under consideration by the Federal Communications Commission (PR Docket 92-235).

These constituents are particularly concerned with how the proposed rules will effect the radio-controlled frequencies primarily used for operating radio-controlled model airplanes. Many of these constituents construct, and operate radio-controlled models and believe that the proposed rules will create a dangerous interference between the radio controlled model airplanes and the private land mobile dispatch operations by spacing the frequencies used for each type of use too closely together. These constituents have indicated they would like the 10kHz spacing currently in use to remain in place, rather than closing the gap in the frequency to 2.5 kHz.

I trust you will associate these concerns with the other comments you are receiving on this proposed rule, and any information you might be able to provide my office in this regard will be greatly appreciated. Thank you.

Best regards,

Steve Buyer  
Member of Congress
